

HubForge OS Domain Packs

Purpose

HubForge OS uses universal reasoning infrastructure.

However, every field contains specialized expertise.

Domain Packs allow HubForge OS to adapt to specific knowledge environments.

The Core Engine remains universal.

Domain Packs provide expertise.

Architecture

HubForge OS

Core Intelligence Engine

↓

Domain Packs

Each Domain Pack contains:

- Specialized knowledge ontology
 - Framework libraries
 - Decision rules
 - Evidence databases
 - Evaluation criteria
 - Prompt systems
 - Domain memory structures
-

Social Impact Pack

Supports:

- Program Design
- Monitoring Systems
- Evaluation Frameworks

- Research Design
- Learning Systems
- Institutional Memory

Knowledge Frameworks

- Theory of Change
 - Logical Framework Analysis
 - Outcome Mapping
 - Survey Design
 - Impact Evaluation Methods
-

Healthcare Pack

Supports:

- Clinical reasoning
- Diagnostic support
- Treatment planning
- Patient risk modeling
- Medical decision systems

Knowledge Frameworks

- Clinical protocols
 - Treatment pathways
 - Symptom reasoning trees
 - Medical evidence libraries
-

Education Pack

Supports:

- Curriculum design
- Learning outcome measurement
- Student assessment systems
- Learning analytics
- Education planning systems

Knowledge Frameworks

- Learning taxonomies
- Assessment systems
- Curriculum frameworks
- Instructional design systems

Research Systems Pack

Supports:

- Literature synthesis
- Hypothesis generation
- Experimental design
- Statistical reasoning
- Methodological critique

Knowledge Frameworks

- Experimental methods
 - Research methodology
 - Statistical frameworks
 - Sampling systems
-

Public Policy Pack

Supports:

- Policy simulation
- Regulatory reasoning
- Governance design
- Public sector strategy
- Institutional reform systems

Knowledge Frameworks

- Policy frameworks
 - Regulatory systems
 - Governance models
 - Economic modeling
-

Climate Intelligence Pack

Supports:

- Climate adaptation planning
- Vulnerability assessment
- Resilience strategy
- Resource allocation modeling
- Environmental decision systems

Knowledge Frameworks

- Climate science frameworks
 - Resilience indicators
 - Adaptation planning systems
-

Legal Systems Pack

Supports:

- Case analysis
- Legal research
- Compliance reasoning
- Regulatory interpretation
- Contract review systems

Knowledge Frameworks

- Case law structures
 - Legal precedent systems
 - Compliance frameworks
-

Enterprise Systems Pack

Supports:

- Strategic planning
- Operational decision systems
- Risk management
- Organizational intelligence
- Business optimization systems

Knowledge Frameworks

- Strategy frameworks
 - Business process systems
 - Operational analytics
-

Future Expansion

Any field requiring expert reasoning can become a Domain Pack.

Potential future packs:

- Agriculture
- Cybersecurity
- Defense Strategy
- Energy Systems
- Manufacturing
- Supply Chain Systems
- Urban Planning

Design Rule

The Core Engine never changes.

Only knowledge changes.

This allows HubForge OS to become universal decision intelligence infrastructure.
